

With Regulation 1907/2006/EC of the European Parliament and Council from the 18th of December 2006, REACH entered into force on June 1st 2007. We offer you tailored Services to stay in the EU market under REACH.

Your easy way into the EU-market Only Representative

Manufacturers of chemicals outside Europe are key producers of high value chemical substances and export significant volumes to the European market. With the implementation of REACH, the legal framework for conducting business in the EU will change for Non-EU manufacturers and trading companies.

These manufacturers have to comply with all the registration requirements enforced by REACH to market their products in the EU. This requires a representation in the European Union, and provision of comprehensive chemical, physical and toxicological data for each substance to the REACH registration office.

A representation can be created either through setting up a legal entity or by having every importer conducting the registration needs.

A more efficient and less costly way is to be represented by an Only Representative, as laid down under Article 8 of REACH.

Chemservice fulfills the specific requirements to make sure the authorities can communicate with a person with profound knowledge in the practical handling of substances. Moreover by appointing an Only Representative the Non-EU manufacturer gets more control over the registration process and avoids having to disclose potentially sensitive information to the importer.

Also for EU Importers, the Only Representative has advantages; the importer will be relieved from his obligation to act as registrant under REACH and will be regarded as downstream user.

The representative would have the legal responsibility to comply with all relevant obligations under REACH.

Chemservice guarantees not be covering the registration duties for the same substance for another Non-EU manufacturer. This avoids any conflict of interests and ensures that your sensitive data will not be accessed by your competitors. Chemservice is your loyal partner and guarantees confidentiality.

OUR SERVICES:

- ✓ Only Representative
- ✓ Portfolio and data examination
- ✓ Development of efficient testing strategies
- ✓ Preparation of Technical Dossiers and Chemical Safety Assessments
- ✓ Client representation in consortia and at authorities
- ✓ Data Brokering
